The science fair was finally here.  
Everyone was excited.  
Who was going to win the prize?

Ronald set up at the science fair.  
He brought a robot run by a rat.

It didn't work.  
The rat slept instead.

Valerie set up at the science fair.  
She brought a soda volcano.

It didn't work.  
The volcano leaked instead.

Hector set up at the science fair.  
He brought a rubber band  
helicopter.

It didn't work.  
The helicopter crashed instead.

Joy set up at the science fair.  
She brought four lovely plants  
in four pots.  
The other kids sighed.

It worked!

Joy had given the four plants water and sunlight. She had sung to only two of the plants every day. Those plants had grown the tallest.

The teacher smiled at Joy's chart. That afternoon, Joy went home with the prize. The other kids started to plan for next year's science fair.
